

# Ronald Reagan Loved Cutting Taxes. But He Raised the Highway User Fee To Strengthen the American Economy!

“More efficient roads mean lower transportation costs for the many products and goods that make our abundant way of life possible.”

“So what we’re proposing is to add the equivalent of 5 cents per gallon to the existing highway user fee, the gas tax. The cost to the average motorist will be small but the benefit to our transportation system will be immense.”

*President Ronald Reagan  
November 27, 1982*

## If it was right for Reagan, it’s right for us!

Ronald Reagan proved tax cuts can spur our economy. But he also knew investment in our highway and public transportation infrastructure is essential.

Making our transportation system safer and reducing traffic congestion will improve Florida’s productivity, strengthen our state’s economy, and give you and your family more time together.

### It’s OK to be a conservative and support an adjustment to Florida’s transportation user fees.
